

# SYNAPSY HAPPY HOUR

16 May 2018, Geneva

SCIENCE & APERO

**WHERE: Room B04.1522, 4th floor, new CMU building,**

*Rue Michel-Servet 1, 1205 Genève*

**WHEN: 14H TO 16H30**

## THEME: Models of Early Psychosis

**Prof Alan Carleton**

*Circuit dysfunction in 22q11DS mouse model and beyond.  
(14h-14h30)*

**Johanna Maeder, Prof Eliez Lab:**

*Long-term memory in 22q11.2 deletion syndrome: investigating  
accelerated long-term forgetting and neuronal correlates.  
(14h30-15h)*

*Coffee break (15h-15h30)*

**Mélodie Dérome, Prof Debanné Lab:**

*Neural underpinnings of anomalous self experiences in typically  
developing adolescents: positive schizotypy as a distal risk factor for  
psychosis?  
(15h30-16h)*

**Pavo Orepic, Prof Blanke Lab**

*Robotically-mediated sensorimotor conflicts related to presence  
hallucination alter loudness perception.  
(16h-16h30)*

**PIs: A. Carleton & S. Eliez**
